

Summary of Indoor Residual Spraying in Burkina Faso

AFM summarized indoor residual spraying (IRS) activities occurring in African countries based primarily on reports from the World Health Organization (WHO), Global Fund and the President's Malaria Initiative (PMI). Little information was available from other sources. AFM hopes IRS activities will be sustained and expanded as appropriate, and that all donor agencies supporting IRS with public funds will make available detailed and accurate reports in the future. Below is the summary of IRS activities in Burkina Faso.

Global Fund Support ^a	No IRS funding
----------------------------------	----------------

a. The Global Fund to Fight AIDS, Tuberculosis and Malaria: <http://www.theglobalfund.org/en/>

Burkina Faso was awarded two Global Fund malaria grants: a Round 2 grant in 2003 and a Round 7 grant. Neither of the Original Proposals requested funding for IRS. According to the Round 7 Original Proposal, in spite of the existence of intra-domiciliary spraying in the strategic plan 2006-2010, its introduction is not effective in the country. Funding will be requested from partners for its gradual introduction.
